Environmental Information Disclosure for Electric Power Supply Service in Delaware

Sources of Electricity Supplied for the quarter ending 09/30/26

Power Source	Percentage of Total
Captured Methane	0.42%
Coal	16.73%
Fuel Cell (non-renewable)	0.02%
Gas	45.87%
Hydro	0.61%
Nuclear	29.24%
Oil	0.44%
Other	0.07%
Solar - Photovoltaic	4.04%
Solid Waste	0.41%
Wind	1.98%
Wood	0.17%
Total	100%

Air Emissions - The amount of air pollution associated with the generation of electricity for this region is shown below in pounds emitted per megawatt hour of electricity generated.

Sulfur Dioxide (S02) 0.38

Nitrogen Oxides (Nox) 0.32

Carbon Dioxide (C02) 805.58

CleanSky Energy is providing this Environmental Disclosure Label pursuant to the Delaware Public Service Commission's Rule 3001(14). Power plants can generate electricity from several different fuel sources, resulting in different emissions. CleanSky Energy reports fuel sources and emissions to customers to compare data among the companies providing electricity.

*PJM Interconnection is a regional transmission organization (RTO) that coordinates the movement of wholesale electricity in all or parts of 13 states and the District of Columbia.

For additional information about this label, please contact CleanSky Energy at (888) 355-6205.
